

April 17, 2015, 4PM

Location: UMB, 100 Morrissey Blvd

(Integrated Science Complex, ISC on map, Room 3300)

Greater Boston Crystal Group

Allen Lab (BU)
Dowling Lab (UMB)
Drennan Lab (MIT)
Mattos Lab (NEU)

Presenters:

Lindsey Easthon (Allen Lab): Crystallographic
Studies of Oxalate Decarboxylase

Elizabeth Wittenborn (Drennan Lab):
Building a Life on CO: Metallocofactor
Maturation in Carbon Monoxide
Dehydrogenase

Public transportation is easiest: JFK/UMass stop on the Red Line. Shuttle #1 goes directly to the UMB Student Center. For those who must drive: Parking costs \$6 standard rate, but spaces are very limited due to construction. There are three active lots close to campus (Beacon's Lot and University Lots B and D on map) and parking at the Boston Convention Center with a shuttle bus to campus when parking is full.
